

Week of: 2-7-2020

A Peek at Our Week:

- ❖ This week we introduced the names of the planets and learned their order from the sun. We will continue this next week and finish up our unit on the solar system.
- ❖ We have finished up our geography study of Antarctica and will introduce South America next. We will be learning about the rainforest, animals, and landmarks of the continent.
- ❖ We have really been focused on number sense and addition of 4-digit numbers. Some students are learning to carry over up to the thousands place.
- ❖ As a class, we are continuing to work on learning all of the basic shapes including heart, star, and some of the polygons like pentagon, hexagon, and octagon.
- ❖ With St. Valentine's Day approaching, we are learning a little about the saint and his work on Earth of protecting marriages. He was a priest and lived out his final days in jail.
- ❖ Valentine's Day celebration will occur Friday. Please refer to the info sent out via remind. We have everything we need at this point, thank you.

Coming UP:

Wed. 2/12 – PTS mtg. 6:30

Mon. 2/17 – NO SCHOOL

Wed. 2/19 – Spaghetti lunch

Teacher's Note

At every drop-off/pick-up we are required by state regs. to get a parent signature. I will do my best to make this as convenient as possible so please bare with us as we figure out the easiest solution during these transition times.

Additionally, as required by state regs. we will be offering milk at lunch. Please continue to send a drink as usual. Also, please be diligent in providing your child a healthy, balanced lunch including a fruit, veg, protein, and grain. Many thanks for understanding that we are doing the best to abide by state requirements while also operating under the parameters of our private school.
